PROFESSIONAL SUMMARY

Entry-level Data Analyst with hands-on experience in SQL, Python, Excel, Power BI, DAX, data cleaning, data validation, exploratory analysis, and KPI reporting. Experienced in building end-to-end analytical solutions involving data preparation, ETL, SQL analysis, data modelling, interactive dashboards, and business insights. Previously worked on real-time operational monitoring systems, validating live data and translating operational metrics into actionable KPIs for non-technical stakeholders. Strong analytical thinking, attention to detail, problem-solving, and ability to communicate data-driven insights clearly.

TECHNICAL SKILLS

- **Data Analysis:** SQL, Python, Pandas, NumPy, Exploratory Data Analysis (EDA), Data Cleaning, Data Validation, Data Profiling, Root-Cause Analysis
- **Business Intelligence & Visualization:** Power BI, DAX, Power Query, KPI Analysis, Dashboard Development, Trend Analysis, Interactive Reporting
- **Excel:** PivotTables, XLOOKUP/VLOOKUP, Advanced Formulas, Data Analysis & Reporting
- **Data Engineering & Preparation:** ETL, Data Wrangling, Data Collection, Web Scraping, Data Transformation, Data Integrity Checks.
- **Databases:** PostgreSQL, MySQL, Database Management, Data Modelling, Star Schema
- **Core Strengths:** Analytical Thinking, Problem Solving, Attention to Detail, Communication, Cross-functional Collaboration

PROFESSIONAL EXPERIENCE

Front-End Developer | MD Infotech, Trichy *Apr 2024 – June 2025*

- Built and maintained real-time monitoring dashboards for wind and solar energy systems, translating raw operational data into KPIs (energy output, machine status, performance trends) for non-technical stakeholders.
- Performed data validation and accuracy checks against live field readings during onsite testing at wind turbine and solar plant sites, ensuring data integrity before it reached operators.
- Redesigned legacy dashboards into modular, user-friendly layouts, improving how operators interpreted and acted on operational data.
- Collaborated with cross-functional and remote teams to align dashboard outputs with backend data sources, gathering requirements and reporting back on data discrepancies.
- Supported documentation, UI testing, and deployment activities across SCADA integration projects for iFox, Renfra Energy, and Windparts India Pvt Ltd.

DATA ANALYTICS PROJECTS (SELF-DIRECTED / PORTFOLIO)

Supply Chain Analytics

SQL | Python | Power BI | GitHub - practice project using synthetic data

- Built an **end-to-end supply chain analytics solution** using Python, PostgreSQL, SQL, and Power BI to analyse sales, profitability, customer performance, and delivery risk across **180K+ order items**.
- Designed a **star-schema data warehouse** and Python ETL pipeline, then developed SQL-based **KPI and root-cause analysis** covering sales, profit, margins, shipping, customers, products, and geographic performance.
- Built a **4-page interactive Power BI dashboard** with DAX measures and identified key business patterns, including **54.83% late-delivery risk**, shipping-mode differences, and category/geographic profitability trends.

Financial Transactions & Fraud Detection Analytics

SQL | Python | Power BI | GitHub - practice project using synthetic data

- Generated and analysed **350K+ synthetic** financial transactions in PostgreSQL, applying rule-based logic to flag **22K+ fraud alerts**.
- Built interactive Power BI dashboards for **fraud monitoring, customer risk profiling, and branch-level exposure analysis**, with DAX measures for fraud rate and risk segmentation.

CSK IPL Analytics (2008–2025)

Python | JavaScript | Power BI | Excel | GitHub

- Collected and cleaned 16 seasons of IPL team performance data using **automated web scraping** (Puppeteer, Cheerio), then built a Python **ETL pipeline** to standardize and merge multi-season datasets.
- Designed a star-schema data model in Power BI and **wrote 50+ DAX measures** to track batting, bowling, fielding, and team-level KPIs.
- Built an **8-page interactive dashboard** with slicers, drill-throughs, and tooltips to surface performance trends and support narrative-driven insights.

E-Commerce Sales & Customer Analytics

PostgreSQL | SQL | Python | Power BI | Excel | GitHub - practice project using synthetic data

- Built a PostgreSQL data warehouse with staging tables and dimensional modelling on **20,000+ synthetic** transactional records generated with Python (Faker).
- Wrote **18+ analytical SQL queries** (joins, aggregations, subqueries) covering **revenue trends, AOV, customer retention, and churn**; automated SQL-to-Excel exports with Python.
- Delivered a 4-page Power BI dashboard (Executive Summary, Customer Insights, Product Performance, Profitability) surfacing patterns such as repeat customers driving **~82% of revenue**.

CERTIFICATIONS & JOB SIMULATIONS

- **GenAI Powered Data Analytics Job Simulation —** Forage / Tata Group | June 2026
- **Data Analytics Job Simulation —** Forage / Deloitte Australia | June 2026
- **Risk Job Simulation —** Forage / Goldman Sachs | June 2026
- **Claude 101 Certification —** Anthropic | June 2026
- **Career Essentials in Data Analysis —** Microsoft & LinkedIn | September 2025
- **Learning Data Analytics 2: Extending and Applying Core Knowledge —** LinkedIn | September 2025
- **Learning Data Analytics: 1 Foundations —** LinkedIn | August 2025

EDUCATION

- **Master of Science, Information Technology —** Bishop Heber College | 2024 | 76.66%
- **Bachelor of Science, Computer Science —** Bishop Heber College | 2022 | 76.30%

AWARDS & ACHIEVEMENTS

- **Academic Topper** - 3rd and 4th Semester, Bishop Heber College (2023–2024)
- **Certificate & Award of Appreciation** for department contribution, Bishop Heber College
- **Runner-up**, Code Race Event, Holy Cross College, Trichy

AREAS OF INTEREST

Data Analytics • Business Analytics • Business Intelligence • MIS & Reporting • Operations Analytics • Performance & KPI Analysis • Sport Analysis • Quality Analysis • Workforce Management • Data Validation & Reporting • Process & Operational Analysis
